ABOUT ME

I am a recent **Computer Science BSc.** graduate with six months of experience working with **C++ and the Qt framework**, as well as **MongoDB**, developing and implementing new functionalities at my current company.

In addition to my professional experience, I am actively enhancing my **backend development skills** by building a **Restful API for an expense tracker** using **Node.js, expresjs and MongoDB**.

I am highly motivated by **continuous learning and problem-solving**, always eager to expand my knowledge and improve my technical expertise.

I enjoy working with different technologies and have no problem switching tech stacks if needed. I am also looking for a **fully remote position** where I can contribute effectively while continuing to grow and learn.

PROFESSIONAL RESUME

SEP, 2024 - PRESENT | SDILAB

Software Developer

- I implemented **nested transactions** in MongoDB in a **modular and reusable manner**, enhancing the system's flexibility and maintainability.
- Currently, I am working on developing a **MongoDB synchronization mechanism** that enables databases to operate **offline** and seamlessly **sync once reconnected to the network**, improving reliability and data consistency.

JULY, 2021 - NOV, 2023 | FNAC BRAGA

Sales assistant

- Provided **customer support and problem resolution**, improving the shopping experience.
- Managed **transactions and store operations**, ensuring efficiency and accuracy.
- Assisted with **inventory management**, and maintaining product availability.

ACADEMIC PATH

SEP, 2019 - JUL, 2024 | UNIVERSITY OF MINHO

Bsc. in Computer Science
